12 YEAR LIMITED WARRANTY

*Square and Hourglass frames are available only in smooth.

FRAME

The frame is constructed from a 1-inch (25 mm) 6061-T6 extruded aluminum tube. It's welded in eight places for maximum strength and stability.

FRAME FINISH

The finish is an electrostatically applied powder-coating over a phosphate treated frame. The powder is oven cured for extended durability.

BACK

The upholstery and foam are stapled to an injection molded polypropylene or plywood insert, which is attached to the chair back frame. The foam is 0.75-inches thick (1.9 cm) on the front of the backrest, and 0.25-inches thick (0.6 cm) on the back of the backrest.

PITCH

Flex-back chairs feature a dining pitch in the non-flexed position, while non-flex-back chairs feature an event pitch.

SEAT

The upholstery and 2.5-inch (64 mm) foam are stapled to an injection molded polypropylene seat base. The foam is attached to the FormFlex seat base, which features concentric oval patterns that are designed to flex with the weight of the user (patented).

ANTI-SWAY BARS

This is made from a 0.5-inch 6061-T1 aluminum bar and designed to improve the stability of the frame.

STACK BAR

The stack bar is standard and is made of 0.63-inch (16 mm) square aluminum bar.

GLIDES

The glides are nickel-plated with a rubber compression spacer to absorb shock.

STACKING

The optimal storage density is 10 chairs per stack with a stack density of 4.8-inches (120 mm) per chair.

FORMFLEX

Full flex travel is 4.5 inches +/- 0.25 inches for individualized seating comfort. The device features a unique fail-safe apparatus.

STACK BUTTONS

Eight stack buttons protect the finish and stabilize the legs when the chairs are stacked.

GANGING

A retractable ganging option available.

DIMENSIONS

BACK SHAPE	SEAT HEIGHT	OVERALL HEIGHT	WIDTH	WEIGHT	FLEX BACK
CROWN	19 in (48 cm)	37 in (94 cm)	18.6 in (47 cm)	12.0 lbs (5.4 kg)	+ 0.5 lbs (.23 kg)

WARRANTY

MityLite warrants its Elite Series chair frames to be free from defects in materials and workmanship under normal use, service, and handling for a period of twelve [12] years. MityLite warrants its chair fabric, foam, seat base and paint for a period of one [1] year from the date of purchase. Customer's Own Material must meet MityLite standards. Upholstery is NOT warranted for outdoor use.

STANDARD

Elite Series chairs meet or exceed all applicable tests from ANSI / BIFMA X 5.1 - 2002. All upholstery and foam meet or exceed California Bulletin 117. Optional Kevlar upholstery lining is available if California TB 133 compliance is required.

SUSTAINABILITY

Elite Series chairs are GREENGUARD Certified® and qualify for credits through LEED® and other sustainable building programs.
